with
us...

Cooper I.S.D.

The Bulldog Way

Small
enough to offer personalized
and caring instruction...

Large
enough to offer multiple career
learning opportunities.

Engaging students in high quality
learning with community support.

Welcome:

Delta County is a great place to live, work and fulfill an education. Students have the opportunity to express themselves through a wide variety of top notch extra-curricular programs. Our students have demonstrated success in academic UIL, band, baseball, basketball, cheerleading, debate, football, livestock shows, one-act play, softball, tennis and track (just to name a few). Cooper I.S.D. is well known for a tradition of excellence both on and off the field. Come on over, make yourself at home and stay awhile! Through C.T.E., students can jumpstart their college programs for:

- Nursing
- Welding
- Business
- Computer
- Culinary Arts

Background:

From elementary to high school, Cooper I.S.D. students exemplify leadership and learning. With 800 students district wide and about sixty students per grade level, Cooper staff members are dedicated to providing the best education with a small town, caring touch.

Walking down the elementary hallways you'll feel an atmosphere full of learning, wonder, nurturing and comfort. The campus serves pre-kindergarten through fifth grade and is in the top quarter of Texas elementary schools in reading. With the Millionaire Club for amazing readers, the Math Fact Club for our mathematically gifted, and other events, we love to celebrate our students' many successes. The elementary science lab is used to engage students in multiple hands-on experiments. From the basics to specialty programs, our elementary envelopes students in a rich learning environment.

Our junior high and high school campuses incorporate a strong foundation with several options for specialized learning. Students benefit from more than 40 hours of on-site college courses including: College Algebra, two semesters of English, U.S. History, Government and Economics. We have a regionally acclaimed Health Science program that prepares students for their choice of career in the health industry. Students interested in a growing number of technical fields such as welding and electrical engineering have options to graduate with only one college semester remaining for their specialized certification. A variety of computer, business, accounting and robotics classes provide avenues of learning that stretch the students' imaginations. State of the art equipment such as a 3-D printer and programmable plasma cutter are enthusiastically utilized by students as they learn to incorporate design and architectural concepts with technical expertise.
